

BLUE TELESCOPE

+ + + + + + + + (Acoustic enters)

|Csus4 C Csus2 C|Csus4 C Csus2 | x4 after 2nd time)

I've got a blue telescope, I'm looking at the world tonight

Through a blue telescope; I wish I may, I wish I might

F Csus4 etc

Not see what I see - sheet metal on sheets of ice

G Csus4 etc

Looking through this blue telescope down a moonstruck road tonight

Blue breath on my windshield, I came to a frozen place

She shivered when I said goodbye - I wish I didn't have to face

Her in that rear-view mirror, though she lives in the heart of me

Looking through this blue telescope

I guess she'll always be a star to me

G/B Am Em F C

The heavens vast and wide

G/B Am Em F G

Wait to escort the bride

Am Em F C

She lifts her wedding veil

G/B Am Em F G

Her breath a lonesome vapour trail

<Solo> (Same chords as verse)

I got this blue telescope - I'm looking for her tonight
Through a blue telescope; tell me, why must the blue angels fight?
Taking one last shot at heaven while they slip stream through paradise
Looking through this blue telescope down a moonstruck road tonight
I'm looking through this blue telescope down a moonstruck road tonight

I've got a blue telescope

Blue telescope

Chords used: C-x3201x, Csus4-x3301, Csus2-x3001x, G-320033,
G/B-x20033, Am-x02210, Em-022000

NB This becomes much easier to sing (for my voice anyway), if you play
it in Bb - the riff thingy works in G too, so you can play it in G
with a capo on the third fret. No I won't transpose all the chords for
you, you lazy swine...

Enjoy!

TAB

Bridge: (Overdub guitar)
