

## THE TIKI BAR IS OPEN

CHORUS:

F#m                    |F#m                    |F#m  
Thank God the tiki bar is open  
                         |F#m                    |C#  
Thank God the tiki torch still shines  
                         |F#m                    |B  
Thank God the tiki bar is open  
                 |F#m                    C#m           |F#m           C#  
Come on in and open up your mind  
  
                 |F#m                    |F#m  
I was out on a leave of absence  
                 |F#m                    |C#  
From any resemblance to reality  
                 |F#m                    |B  
I felt like a rocket launched to the great blue yonder  
                 |F#m                    C#m |F#m           C#  
From the boys down at Kennedy  
  
                 |F#m                    |F#m  
I was driving by his majesty's court hotel  
                 |F#m                    |C#  
Where the sign said praise his name  
                 |F#m                    |B  
I was tired and alone I couldn't see too well  
                 |F#m                    C#m           |F#m           C#  
But I don't think that he was to blame

CHORUS

                 |F#m                    |F#m  
There's a full moon over Daytona beach  
                 |F#m                    |C#  
There's a full moon in my mind  
                 |F#m                    |B  
And my suntan dream is still out of reach  
                 |F#m                    C#m           |F#m           C#  
And the strip malls are robbing me blind  
  
                 |F#m                    |F#m  
Well his name was Mr. Dale Earnhardt  
                 |F#m                    |C#  
And he drove the black number three  
                 |F#m                    |B  
Now the king is gone but he'll not be forgotten  
                 |F#m                    C#m           |F#m           C#  
Nor his like will we ever see

CHORUS

|F#m                  |F#m  
I know a drink ain't no solution  
          |F#m                  |C#  
I ain't had one in seventeen years  
          |F#m                  |B  
But if that tiki bar was closed tonight  
          |F#m          C#m |F#m  C#  
Well I might just disappear

CHORUS TWICE
